

Directions

1. Lay the kite out with the spars (sticks) facing up (back side up).
2. Starting on one end, insert the longer spar through the three (3) fabric sleeves and into the pocket on the side.
3. Insert the other end of the longer spar into the pocket on the side.
4. Attach flying line to bridle loop on the front side of the kite.

Tips & Tricks!

1. Kites fly best in wide open spaces. Avoid flying in areas near buildings and trees.
2. To Launch, stand with the wind to your back.
3. Hold the kite with the nose up in one hand while securely holding the winder in the other.
4. When you feel the pressure of the wind against the kite, let go. As the kite rises, slowly release the line.
5. A high altitude launch is an effective method of getting your kite off the ground in light winds. Have someone stand downwind as you let out as much line as possible (>100 feet). As the kite is released into the wind, tug on the line.
