

Step 1. Take 2 of the "Short spars" and slide an "o-ring" over them and down to the center as shown (A). Then, turn one of the spars 90 degrees to make a plus sign (B). Insert each end of the spars into each connector of the red/blue cube. Continue this step one the opposite side of the red/blue cube first.

Step 3. Repeat Step 2 for the green/yellow cube. When finished, flip the kite over and repeat steps 2 and 3 for bottom part of the cubes.

Step 2. Slide one of the "long spars" from the green/yellow cube through to the purple/orange cube using the 2 holes provided in the center of the kite. Before inserting it into the connector, slip one of the "short spars" and an "o-ring" onto the end. Repeat step B as shown above, then finish inserting the ends of the "short spar" into the other connectors.
